

"A Doctor's Confession to the City of St. Petersburg"

And why, despite all, I still do what I do...

Dear Friend,

Confessions are tough. Real tough. But, sometimes a confession can set the record straight, and I want to give credit where credit is due. Before I talk about my confession, though, let me say a few other things first.

Let me start by explaining the photo in this letter. You know, when I meet people in town they usually say, "Oh, yeah, I know you, you're Dr. Raheb. I've seen your ad with that picture of you and the cute little boy and your beautiful wife." Well, I'm the guy in the middle.

Years ago something happened to me that changed my life forever.

Let me tell you my story.

Back then I was a soldier for the U.S. Army stationed in Germany. I had developed a painful condition known as 'migraine headaches.' The pain in the back of my head, neck and temples was so intense that I couldn't concentrate on my job or do daily physical training. The nagging headaches would last days sometimes, but there's more...

After returning home, a friend of mine convinced me to give their doctor a try. This new doctor does an exam, takes some films, and then "adjusts" my spine. The adjustment doesn't hurt, it actually feels good. I get relief, and I can function normally. Oh, did I mention that this doctor is a chiropractor? It works so well for me, and I'm so impressed with the other 'miracles' I see in his office, that I eventually go to chiropractic school myself.

Now for my wife Heather. She was plagued with acid reflux (chronic heartburn) most of her adult life. She took over-the-counter antacids almost daily. She had bottles of them everywhere! She even tried prescription strength medicine. After I started to "adjust" her spine, the acid reflux started to subside and now her heartburn is gone!

The little boy is Eli and he knows enough to ask me to adjust him when

he feels like he may be getting sick, or sometimes just to stay "tuned up."

It's strange how life is, because now people come to see me with their *migraine headaches*. Also, they come to me with their *carpal tunnel syndrome, chronic pain, neck pain, shoulder/arm pain, whiplash from car accidents, backaches, ear infections, asthma, allergies, sciatica, numbness in limbs,*

Here's what some of my patients had to say:

"Dr. Raheb's Chiropractic methods are completely different from anything that I have ever experienced. I felt better almost immediately." (Susan B. - St. Pete)

"I was in an auto accident. I went to the emergency room and they prescribed pain pills and muscle relaxants. With Dr. Raheb I no longer have the headaches. The pain in my back and leg is gone." (P.B. - St. Pete)

Several times a day patients thank me for helping them with their health problems. But I can't really take the credit. My confession is that *I've never healed anyone of anything*. What I do is perform a specific spinal adjustment to remove nerve pressure, and the body responds by *healing itself*. It's as simple as that!

Studies show that people actually pay less for their long-term overall health care expenses if they are seeing a chiropractor. But, if you are happy with drugs and surgery, then please, don't come see me.

You Benefit from an Amazing Offer - Look it shouldn't cost you an arm and

a leg to correct your health. When you bring in this article by next Wednesday at 3:27pm, you will receive my entire new patient exam for only \$57.

That's with a computerized nerve test, all necessary X-Rays and new patient orientation...the whole ball of wax. This exam could cost you \$300 elsewhere. But, please call right away because we only have a limited number of these exams, so don't miss out. By the way, further care is very affordable **and I have affordable plans for those without the benefit of insurance or for those on HMO's.**

You see, I'm not trying to seduce you to come see me with this low start-up fee, then to only make it up with high fees after that. Further care is very important to consider when making your choice of doctor. **High costs can add up very quickly.** A whole month of care in my office could be what you pay for **one visit** elsewhere.
